

NetSupport Education Solutions

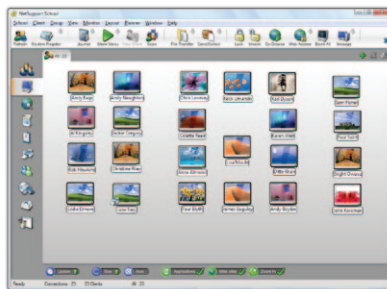

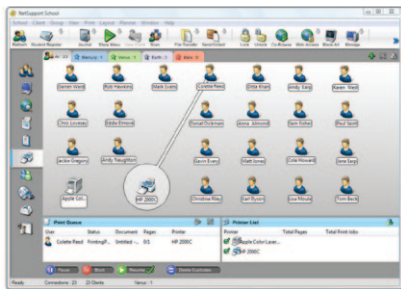

Helping to maximise your investment in IT

The NetSupport education range rises to the challenge and requirements of today's modern, technology-focused schools, colleges and universities. With market-leading classroom management, ICT asset management and desktop notification, NetSupport delivers the tools you need to make the most of your investment in ICT.

NetSupport School – Complete classroom management for your Windows environment

NetSupport School's combination of advanced PC monitoring and real-time presentation tools help teachers improve the efficiency of computer-led lessons. From a single view you can check in real time the status of each PC, deliver engaging presentations, encourage creativity and collaboration, create digital journals for your students to use as a revision aid, instantly test topic understanding and interact visually and audibly with your students, individually or as a group.

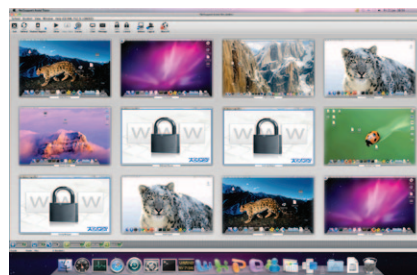

- Internet and application monitoring and control
- Real-time instruction and presentation tools
- Printer and device management
- Language lab mode
- Digital student journals
- Testing and quiz components
- Hand out and collect files
- Remote PC management

“An unbeatable range of classroom management features and is, in many ways, the best of its kind on the market.” **ICT Reviews.**

NEW NetSupport Assist – Supporting the next generation of Apple Mac® and Linux classrooms

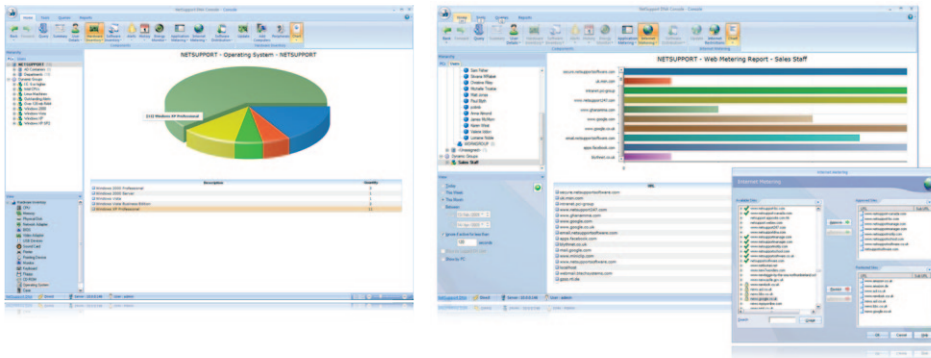

With NetSupport Assist, teachers can improve the efficiency of classroom teaching by centrally instructing students from their computer. From registering attendance at the start, monitoring activity during and logging off machines at the end of the lesson, NetSupport Assist allows teachers to focus their time and attention on their students, rather than on managing the software.

- Real-time instruction tools
- Student register
- Real-time thumbnail view
- Remote PC management
- Powerful student surveys
- View/control student screens
- Application metering
- Internet metering/control
- Group or 1:1 chat
- Full wireless support

NetSupport DNA – IT asset management

If your school leadership team is to make informed decisions on upgrades or the roll-out of new technology, then information is key. Having an accurate inventory of your IT assets is critical when deciding whether to purchase more assets, redistribute current assets, or retire them completely. Providing the tools needed to effectively manage the 'true' cost of IT, NetSupport DNA is a modular solution that delivers powerful hardware/software inventory, licence management and more.

- Hardware and software inventory
- Licence management
- System and PC alerting
- Application and internet metering
- Software distribution
- Energy monitoring
- Enterprise reporting
- Optional web-based incident management

“NetSupport DNA shows that Asset Management needn't be costly nor complex. It's easy to deploy, offers an extensive range of features and the various option packs mean you can save cash by purchasing only what you need.” **PC Pro** recommended.

NetSupport Notify – Desktop alerting and notification

The need to deliver reliable and effective messages has never been more essential as part of the day-to-day management of a school infrastructure. NetSupport Notify enables administrators to deliver alerts and notifications direct to all or selected desktops across a school within seconds. The message automatically takes screen focus on recipient computers so can't be ignored or saved for later. Whether it's general news, IT announcements or security alerts, NetSupport Notify ensures your message grabs the receiver's attention.

“This is a good tool for increasing the security of our schools and for improving communication between the administration, technical and instructional staff.” **Tech & Learning.**

- Support for Windows, Mac and Linux
- Prioritise messages and alerts
- Fully customisable, add your own school branding
- Include audible alerts
- Deliver to all or selected departments
- Schedule alerts in advance
- Delivery tracking
